

CMI Income Tax

CMI's tax application is a comprehensive suite of software tools that were designed for Ohio based tax authorities. CMI tax software is developed using cutting edge database and development technologies, which provides our customer with a robust tax billing and collection system tailored to each's unique and individual needs. Our solution is simple enough for the single-user office and powerful enough to manage large tax departments. Features such as integration to Microsoft Word & Excel, web connection, document management, ACH payments, and postnet barcoding will assist you in delivering the best possible service to your tax payers. CMI Tax collection software is used at over 100 sites.
