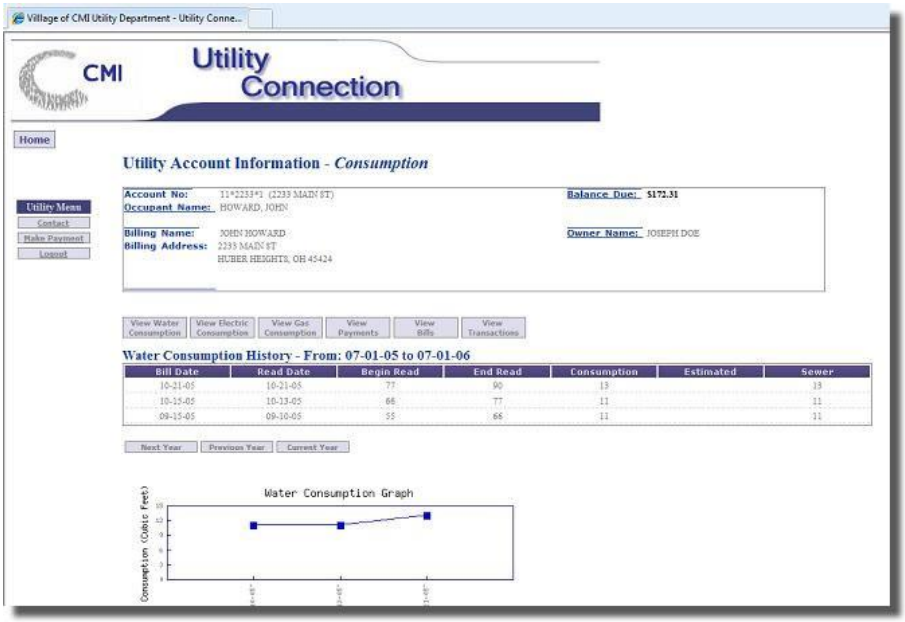
Utility Connect



In today's fast paced world the use of the Internet is becoming more and more common. If you're like many people the use of the Web has become a convenient way to quickly reference information on a daily basis. The Web has also become an efficient way to manage personal finances and pay monthly bills. This is why CMI is happy to announce its latest Internet "Connection Suite" product. CMI is now able to offer our Utility Billing Application as a Web enabled product. This Enhancement Module to the Utility Application allows customers to view their balance, consumption and prior bills, as well as pay bills on-line. The application utilizes the Utility Billing backend database information to securely display "real time" account information to the customer for review and payments through a secure transaction process. An on-line demonstration of this product is available at http://webconnect03.civicacmi.com/cxn/utilV102/utility. For additional information on this exciting new offering, please email sales@civicacmi.com.

Key Features

- Web Access to "Real Time" Account Information
- Secure Web Payment Processing
- Consumption Charting
- Reduced Data-Entry for Utility Clerks
- Data Encryption for full Security
- Integration to most payment processing services
